

JUNIOR

150N children inflatable lifejacket (20 – 50 kg) approved to DIN EN ISO 12402-3. New SECUMAR Winglet swim bladder with double layer system for double safety. Front D-ring.

BUOYANCY CLASS	BUOYANCY CHAMBER	APPROVALS
		

STANDARD EQUIPMENT AND CHARACTERISTICS

The new DUO Protect SURVIVAL range combines the very best in safety equipment with a brilliant and obvious addition. The DUO Protect system has long been a must for kids who like to lie face down in their SURVIVAL on the jetty when using their dip nets. Or, in the heat of the moment when things can become hectic on board, or the conditions become violent, it can happen that a member of the crew snags their jacket or is thrown against a sharp edge. Even if both layers of film become damaged, the buoyancy chamber in the SURVIVAL seals itself to a large extent automatically when it is inflated.

ADVANTAGES

- Outstanding wearer comfort thanks to ergonomic preformed shoulders.
- New "Winglet" buoyancy bladder for higher freeboard and stability in the water.
- DUO-PROTECT twin skin buoyancy bladder for double protection against mechanical damage.
- Integral safety harness.

Features

Performance Class (ISO 12402)	150 N
Method of Inflator	Automatic inflator 4001S
Buoyancy	165 N
CO ₂ -Cartridge	32 g CO ₂ Dock
Buoyancy chamber type	Bright yellow buoyancy chamber
Standard equipment	In protective cover, neck fleece, oral valve, whistle, lifejacket storage bag
Integral harness	Yes
Closure	Front click buckle
Crutch strap	Yes
Spray Hood	Optional
Emergency light	Optional
Integral pocket for ELT	No
Inspection window	Yes
Lifting becket	Yes
Size / Body weight	over 50 kg
Buoyancy chamber	Classic
Type of buoyancy	Inflatable
Type of clothing	Light clothing
Approval	CE
3M® reflective strips	Yes
Back section	Back strap
Protective cover	Polyamide
