

SECUFIT

The 150N SECUFIT lifejacket is simply pulled over the head and is cut short to sit directly on the chest so it cannot interfere with any body movements. This also makes it the right choice for anglers with plenty of room for casting and also won't get in the way when playing and landing a fish.

BUOYANCY CLASS	BUOYANCY CHAMBER	APPROVALS
		

STANDARD EQUIPMENT AND CHARACTERISTICS

The SECUFIT lifejacket offers freedom of movement which is the alpha and omega for canoeists, rowers and paddlers. In order to create movement, their upper body is constantly in motion.

Ergonomic shape

The SECUFIT's outer cover has an ergonomic preformed shape so it barely touches the neck. Overall, it's so well padded with softshell material that it can be worn very comfortably. The back strap can be easily adjusted to the individual body size. The outer cover zip has a predetermined breaking point. Once the firing mechanism comes in contact with water it bursts extremely quickly.

Furthermore, the protective cover of the SECUFIT is equipped with reflective strips for better visibility in low light conditions, offering yet another safety advantage.

Brand-new bladder for 150N performance class

The SECUFIT belongs to [150N performance class](#). Its special Winglet buoyancy chamber helps it exceed this class providing increased freeboard and greater stability.

Features

Performance Class (ISO 12402)	150 N
Method of Inflator	Automatic inflator 3001S
Buoyancy	160 N
CO ₂ -Cartridge	32 g
Standard equipment	In protective cover, Softshell neck area, oral valve, whistle, reflective strips, suspension loop, lifejacket storage bag
Colour	Blue
