

VIVO 50

50N adult buoyancy aid approved to ISO 12402-5 for canoes, kayaks and rowing boats. One size fits all. High freedom of movement. Easily adjustable.

BUOYANCY CLASS	APPROVALS
	

STANDARD EQUIPMENT AND CHARACTERISTICS

Specially designed for use in canoes, the VIVO 50 is simply worn by pulling over the head and fixing the crutch strap keeping the sides clean for unhindered paddling.

Approvals

- DIN EN ISO 12402-5

ADVANTAGES

Fixed Foam – The buoyancy is built in – and ready at all times!

Fixed foam lifejackets and buoyancy aids have one great advantage – the buoyancy is always there.

No accidental inflation and no replacement of gas bottles. Foam lifejackets are ideal for those that might quite readily get very wet, such as dinghy sailors, kiteboarders or windsurfers. SECUMAR fixed foam products feature a comfortable fit, warm body protecting materials and a few very special features.

Please always keep in mind:

Foam lifejackets and buoyancy aids can never reach the same buoyancy and rotation force as inflatable lifejackets so cannot be regarded as a substitute. The simple formula is: more clothing – more Newtons! This means, the heavier the clothing the greater size of lifejacket required.

Features

Performance Class (ISO 12402)	50 N
Buoyancy	45-120 kg 50 N
Buoyancy chamber type	Bouyancy aid
Colour	Blue, Orange, Red
Closure	Side closure
Crutch strap	No
Emergency light	No
Lifting becket	No
Approval	CE
Type of buoyancy	Fixed foam
Type of clothing	Light clothing
3M® reflective strips	No
Protective cover	Polyamide
